

## Challenge-Based Research Funding Program Results

ID	Nombre del proyecto	Modalidad	Challenge	Topic
TM-18-292	ASemi-Synthetic Skin Substitute that Enhances Coagulation,Vascularization,andAntibacterialActivity inChronicWoundsandBurns:Next-GenWoundHealingTherapeuticDevice	Transactional Grants	F. Development of new strategies to improve human health, through early diagnostic tools and innovative therapy	F-T3. Protection of organ damage caused by ischemic and oxidative injury
TM-18-489	microBioMe, the microbiota decipher: a platform for the in vitro evaluation of the impact of exogenous compounds on the human gut microbiota and their potential health benefits	Transactional Grants	B. Promote the transformation of cities and communities to make them more sustainable, inclusive and prosperous	B-T10. Biotechnology for health, food and environment
TM-18-501	INNERT Portable sterile environment equipment for ophthalmological procedures	Transactional Grants	B. Promote the transformation of cities and communities to make them more sustainable, inclusive and prosperous	B-T1. Design for the vulnerable (gender, poverty, marginalized communities, access to technology, early childhood, etc.)
